

Excel HR Laser

Hair Remvoval without Discomfort

The Center for Functional Medicine is excited to announce our new laser service called **Excel HR**, esigned to help our patients, both men and women, address unwanted hair without discomfort.

What is Excel HR

Developed by the pioneers of laser hair removal technology in 2000, Excel HR is the next generation premium laser hair removal technology for women and men of all skin types, even tanned skin patients, available all-year-round.

What makes Excel HR laser hair removal different from other laser hair removal technologies?

in each and every pulse, efficiently reducing the number of treatments required.

Excel HR significantly improves patient comfort by generating continuous cooling before, during and after each laser pulse. Unlike limitations of older technologies that use low-powered energy sources like pulsed light, Excel HR only uses true, premium, laser sources to achieve the safest, most effective results for patients of all skin types.

What can I expect?

- Minimal to no discomfort
- Lasting results
- No Downtime

How many treatments does Excel HR laser hair removal require?

The total number of treatments varies based on the area treated. Typically 4-5 treaments spaced 6-8 weeks apart is recommended.

Why does laser hair removal require multiple treatments?

Laser and other energy-based hair removal require multiple treatments because hair grows in different phases. Hair can take 6-12 weeks to grow from root to surface. This growth stage is known as the anagen stage, and this is the perfect time to receive laser hair removal. You know when you are due for your next treatment session when hair in the treated area begins to grow back. It is essential to stick with the treatment schedule we suggest. Missing a treatment could allow your hair to enter the next stage, which can increase the number of treatments initially required.

What areas and what type of hair can be treated?

Due to Excel HR's superior technology, exceptional results are achievable on all hair types, fine or coarse. Commonly requested areas include underarms, legs, bikini area as well as men's chest and back.

Please contact MK@thecffm.com for more information and to schedule a treatment.
